Dear Mr. Marshall

I am writing you this letter to express my extreme disapproval of the South Delta Improvement Project (SDIP). As a resident in Discovery Bay this project endangers my home and the safety of all of us who use the delta and call it our home. This project may cause flooding in our area during high tide season in winter and dangerous water conditions during the summer lower tide season.

This project would only benefit the residents in Southern California who do not use the delta and do not live here. They need to find another source of water or reduce their consumption of a resource that they do not have. Just like any other consumer be it water or power. If you don't have it you can't use it.

Regards,

  
Karey Guerra
